

Liquid Calcium Chloride - Liquid Calcium Chloride

Product: Liquid Calcium Chloride

Physical Properties: Clear, Clourless solution of Calcium Chloride in water, odourless, hygroscopic and forms a eutectic (lowest freezing point) with water at 30% Calcium chloride that has a freeze point of about - 600F.

ITEM	SPECIFICATION
Assay , % Calcium Chloride	32 - 38
Alkali Chlorides , % as Sodium Chloride	0.5 - 1.3
Total Alkalinity , % as Calcium Oxide	0.005 - 0.04
Specific Gravity , at 600F	.317 - 1.351
Viscosity , CP at 500F	4.35 - 5.12
PH (5%)	8 - 10

Uses: Refrigeration, Cement Industries, Chemical Manufacturing, Highway construction and maintenance, Mining Industries, Paper Manufacture, Petroleum Industries, Wastewater Treatment etc.

Always read and be familiar with MSDS information before handing the product.
